EXECUTIVE SUMMARY

Aspiring Software Developer with strong knowledge of the MERN stack, JavaScript, and RESTful APIs, along with a solid foundation in programming and problem-solving. Committed to developing efficient applications, learning modern technologies, and contributing to organizational success through innovation and teamwork.

EDUCATION

EGSP Engineering College, Nagapattinam	09/2023 – 05/2027
B.Tech, Computer Science and Business Systems (CSBS) CGPA: 7.9	
Thanthai Periyar GOVT. HR SEC School, Karaikal	07/2021 – 04/2023
HSC 79%	
Karaikal Ammaiyar HR. SEC School, Karaikal	06/2020 – 04/2021
SSLC	

SKILLS

Technical Skills: React.js, Node.js, Express.js, MongoDB, Mongoose, RESTful API Design, Authentication (JWT, OAuth2), Role-Based Access Control (RBAC), Bootstrap, Responsive Web Design

Soft Skills: Adaptability, Communication, Time Management, Problem Solving, Quick Learner

Tools: Git, GitHub, GitHub Actions (CI/CD), VS Code, Postman, MongoDB Compass, Vercel, Render, AWS EC2

Programming Languages: JavaScript

CERTIFICATIONS

• TCS iON — Young Professional Soft Skills	03/2025
• NPTEL — Human Computer Interaction (In English) — 98%	01/2026 – 04/2026
• NPTEL — Organizational Behaviour: Individual Dynamics in Organization — 81%	01/2026 – 04/2026

EXPERIENCE

Cognifyz Technologies — Full Stack Developer

- Built and deployed 5 full-stack MERN applications (PulseBoard, ServerPulse, AuthVault, ShopNest, FormFlow) through self-paced, task-based development, gaining practical experience in frontend and backend development, database management, and RESTful API design.

CodeAlpha — Front-End Developer

- Adapted quickly to a new tech stack and workflow, delivering responsive front-end components within the internship timeline.

PROJECTS

VendorBridge – Procurement ERP System

- Built a full-stack Procurement ERP with vendor management, RFQ engine, quotation comparison, Purchase Orders, and invoice tracking, using 4-role RBAC (Admin, Manager, Procurement Officer, Vendor).
- Integrated Socket.io, Gmail OAuth2, and Cloudinary; deployed frontend on Vercel and backend on Render with JWT authentication and protected API routes.

StockZen – Inventory Management System

- Built a full-stack IMS with real-time stock tracking, barcode scanning, bulk CSV import, and audit logging, using atomic MongoDB operations (\$inc) to prevent race conditions during concurrent stock updates.
- Integrated Google Gemini 1.5 Flash AI chatbot with live inventory context injection and Web Speech API voice input; deployed frontend on Vercel and backend on Render with JWT authentication and WebSocket-based live sync via Socket.io.

Appointment Booking System

- Built a full-stack appointment booking platform with a 4-step booking wizard (date → slot → custom questions → confirm), real-time slot availability, and double-booking prevention via compound MongoDB indexing, using Node.js, Express.js, React 18 (Vite), and MongoDB.
- Implemented 3-role JWT auth (Customer, Organiser, Admin) with OTP email verification, SHA-256 hashed password reset, Gmail OAuth2 transactional emails, and a CI/CD pipeline via GitHub Actions triggering automated Render deploys; frontend deployed on Vercel.
